

Abstract

The difference between the U turn indicators art and other art is simple. The U turn indicators art demonstrates that a U turn is taking place, by flashing, blinking, or displaying, a U turn symbol. Other art shows things like right hand turning indicators, left hand indicators, and or backing up lights. The U turn indicators art shows a blinking U in the middle of the regular car light, although that function can take many forms. No other art exhibits what our art displays, and that is a sign that a U turn is in progress. So to sum it up; our art is different because it is the only art that indicates a blinking, or flashing U for the purpose of displaying that a U turn is in progress.
